Epson SureColor P5000 Wins Best Photo Printer in Prestigious TIPA Awards

- SINGAPORE, April 28, 2017 -

Editors and journalists from photography magazines around the world have recognized an Epson product in the prestigious TIPA Awards 2017. The

winning Epson product this year was the Epson SureColor P5000*, which was named “Best Photo Printer.”

TIPA - the Technical Image Press Association - bases its judgment on the innovation, the use of leading-edge technology, design and ergonomics, ease-of-use and price-to-performance ratio of products in each award category launched over a 12-month period. This year’s awards were selected by representatives from 27 professional, amateur, and business magazines from Asia, Australia, Europe and North and South America, with a delegate from the Camera Journal Press Club in Japan.

TIPA is one of the largest and most influential photographic and imaging press associations in the world. Winning the 2017 award means that Epson has now received a total of 38 awards from TIPA for technologies and imaging products, including inkjet printers, inks, scanners and projectors, since 1997. An awards ceremony will take place in Tokyo, Japan, on June 16, 2017.

The award-winning product received the following citation from TIPA:

Epson SureColor P5000

“The 17-inch SC-P5000 is a desktop proofing, photography and fine art printer that offers a 10-colour ink set, a PrecisionCore TFP printhead and Epson Precision Dot technology. The printer exclusively uses 200ml UltraChrome HDX ink cartridges that deliver an enhanced colour gamut and higher density blacks, with improved print permanence compared to previous models.

“The printer offers improved dust and static control, which means reduced maintenance requirements and greater durability. The PrecisionCore printhead has 360 nozzles per colour for faster printing speeds with variable size droplets as small as 3.5 picolitres, while a 2.7-inch full colour LCD panel makes setup and operation accessible and straightforward.”
