New super-fast Epson SureColor printer wins EDP Award

2 June 2016 – Epson’s new SureColor SC-P20000 (known as SC-P20070 in Southeast Asia) has won “Best Photographic Printer” at the European Digital

Press Association (EDP) Awards announced yesterday at drupa in Düsseldorf. Each year the EDP Awards recognise the very best new innovative products and developments launched into the digital printing market.

The SureColor SC-P20000

Launched in January this year, the 64-inch SC-P20000 combines super-fast printing speeds with superior photo quality and is ideal for high volume commercial print production firms, copy shops, photo labs and high street photo outlets. It is a cost-effective in-house production solution and can be used to create high-quality, large-format POS, short-term outdoor & interior signage, exhibition & display graphics, promotional graphics and photographs. The printer features Epson's PrecisionCore MicroTFP printhead for producing outstanding results up to 2400 x 1200 dpi. Its robust design incorporates a range of innovative technologies and features such as high-precision media feed technology, a newly developed camera-based paper feed stabiliser and media inductive roller system.

Kristin Saus-Opuszynski, European Senior Business Manager, Epson Europe, says:

“This printer combines new rapid printing speeds with the same high output quality that Epson customers have come to expect, while delivering a range of new features and enhanced usability. The EDP Awards recognise innovations that make a difference in the digital print sector, so to receive an award for the SC-P20000 is an achievement we are extremely proud of.”

About Epson

Epson is a global technology leader dedicated to connecting people, things and information with its original efficient, compact and precision technologies. With a lineup that ranges from inkjet printers and digital printing systems to 3LCD projectors, smart glasses, sensing systems and industrial robots, the company is focused on driving innovations and exceeding customer expectations in inkjet, visual communications, wearables and robotics.

Led by the Japan-based Seiko Epson Corporation, the Epson Group comprises more than 67,000 employees in 90 companies around the world, and is proud of its contributions to the communities in which it operates and its ongoing efforts to reduce environmental impacts.
